EXPERIENCE

SIGNAL ALLIANCE TECHNOLOGY HOLDING | FRONT-END DEVELOPER

Jan 2022 – Current | Lagos, Nigeria

- Responsible for building the user interface and developing frontend architecture on various client projects using several technologies (mainly React.js).
- Worked with a group of engineers to build a School on boarding Application with major focus on the Front-End.
- Was part of the team that built the Customer support portal for Cloud SA Africa. where i integrated i chat-bot feature to help make navigating through the website more seamless.
- Ensuring proper documentation and reports in all stages of product life cycles.

CODEWARE NIGERIA | FRONT-END DEVELOPER INTERN

August 2021 – december 2021 | Lagos, Nigeria.

- Developed web pages for PERXELS DESIGN SCHOOL using an internal content management system. Worked with the team that built the company website..
- Helped in converting wire-frames, mock-ups and prototypes for products into functional and scale-able web Applications and seeing them to deployment.
- Testing and Debugging: Learnt the entire process of software development Lifecycle(SDLC), and also helped senior Engineers to carry out unit testing and debugging.

PROJECTS

SA-MARKET | REACT, | REDUX | NODEJS | EXPRESS | STYLED-COMPONENTS

2022

- A fully Functional MERN-STACK E-commerce Application
- Created the Back-End of the Application Using node, express and Mongo Db
- Used RTK-Query to make API calls and consume data from the back-end.
- Used Redux-Toolkit to handle the add and remove from cart functionality.
- Used Local Storage to save Items in the cart.
- Used Styled-components to style the Application and make it visually appealing.
- <https://sa-market.netlify.app/>

HEALTHPRO | REACT, REDUX, CHARTJS, STYLED-COMPONENTS

2022

- A Hospital management Application that can admit and Discharge patients in real time. This project was built using React and Redux/toolkit for state management.
- Implemented a search functionality to make it easier to look for a specific Patient without scrolling through the entire list.
- The Application tells you the Time a Patient was Admitted and when he|she was discharged.
- Created a dashboard to view the Analytic of all Patient Activities (Those admitted and those, discharged) in the Application. and i also Integrated Chartjs to give a graphical representation of all patient activities
- Created a Filter Functionality to filter between Patient Admitted, those that are discharged and those in the emergency ward.
- Table records can also be exported to MS-Excel.
